

## CFL CHOKE

### Features:

- Consumes less power.
- Short circuit and fire protected.
- No heating effect - environmentally friendly.
- Starts-up and glows at relatively low voltage and current - very high tolerance to voltage fluctuations.
- Light glows over a wide input voltage range and under varying voltage conditions.
- Contributes to clean green image by reducing power consumption, tubes & component replacement.
- Two years Guarantee.

### Do's and Don't :

- Don't use CFL's on wider area ie. Halls, Dining room etc.
- Utilize natural light.
- Replace your conventional Copper Choke.
- Use task lighting; instead of brightly lighting an entire room, focus the light where you need it.
- Switch off the lights when not in use.
- Take advantage of daylight by using light-colored, loose-weave curtains on your windows to allow daylight to penetrate the room. Also, decorate with lighter colors that reflect daylight.
