- Environment friendly.
- Proven technology.
- Extend engine life in Gas vehicles.
- Save money.
- No cutting on Gas line.
- Increase average in LPG/CNG vehicles.
- Two years Guarantee.

### Do's and Don't :

- **Pressure cook as often as possible:** Food Cooked in a pressure cooker retains food value. Cooking time is reduced and, more importantly, saves fuel.
- Keep cooking water quantity to the minimum, to cook faster. This will also help you to save time and fuel.
- **Eating together saves fuel:** If all members of the family eat together, reheating of food before serving can be avoided. It will save you time and fuel.
- **Always keep lid on when cooking:** Your cooking is faster while consuming less fuel. At the same time food value is retained.
- Clean burner of gas range and trim or replace the wicks of the kerosene stove regularly. This will save gas and kerosene.
